Following up on the

previous release of Lumion 3.0, we now have Lumion 3.1, which has been in development for the last few months and is now available to the public. We are proud to share the complete new features and performance enhancements of this version. The 3D

modeling feature set has been expanded and updated to include the following: Cylinders, Extension Blocks, Blocks, Spheres, Spheres, and Lavaliers. The 3D parametric scene is now integrated with the component view, allowing the user to now import a scene and

incorporate it as a component into another scene. Therefore, one component scene can be used to create multiple component views of the same scene. Lumion 3.1 is now a DLL file and requires the use of a C++ compiler to use all the features. We've also added support for 3D

printing, and if you have a project with nested rooms, you can now join those rooms. Lumion 3.1 is also compatible with Windows 8.1 and Mac OS X Yosemite. Lumion 3.1 is a 64-bit application, and we are also happy to share that the license terms have changed to include a new

User Agreement.

Lumion is compatible
with AutoCAD, 3ds Max
and Revit. 12 Oct 2015
